**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains claims directed to more than one invention:

- A. Group I, claim(s) 22-38, 48, 49, 51, 53, and 55-58 are drawn to a method/system and antibody product wherein the antibody is isolated by a fluid stream having a selected Ph and isoelectric point, classified in class 436, subclass 516 and class 530, subclass 387.1 for example. (A method, product, and apparatus that require isoelectric point analysis – special technical feature).
  - B. Group II, claim(s) 39-47, 50, 52, and 54 are drawn to a method and system wherein the antibody is isolated by a fluid stream having a selected Ph, classified in class 435, subclass 326 and class 422, subclass 82.04 for example. (A method and apparatus not requiring isoelectric point analysis).
2. The following inventions or groups of inventions are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention, to which the claims must be restricted.

Art Unit: 1641

3. The inventions listed as Groups A and B, do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The method and apparatus of Group A require an isoelectric point and net charge analysis, which are not required in the invention of Group B. Therefore the inventions are directed to different processes that have different required method steps and reagents (being diverse and distinct t). The two Groups A and B, lack the same corresponding technical feature and do not relate to a single general inventive concept under PCT Rules 13.1 and 13.2.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Please note that the classifications in the restriction are illustrative only and **do not** represent all the classes and subclasses which must be searched for each invention; nor is the search limited to issued US patents, but rather includes foreign patents and applications as well as literature searches.

5. Applicant is advised that the reply to this requirement be complete and must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Art Unit: 1641

7. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO fax Center located in Crystal Mall 1. The faxing of such papers must conform to the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The Group 1641 Fax number is (703) 308-4242, which is able to receive transmissions 24 hours/day, 7 days/week.
